

A BRIEF HISTORY OF
THE INTERNET

01

THE
INTERNET

The internet is the global system of interconnected computer networks that use the Internet protocol suite to link billions of devices worldwide.

IN THE *1950s*

The history of the Internet begins with the development of electronic computers in the 1950s. Initial concepts of packet networking originated in several computer science laboratories in the United States, United Kingdom, and France.

1971

The first message was sent over the ARPANET from computer science Professor Leonard Kleinrock's laboratory at University of California, Los Angeles (UCLA) to the second network node at Stanford Research Institute.
